

EzBoard

interactive whiteboard systems

interactive whiteboard systems for the classroom, training room or boardroom

Ezboard provides a cost effective but extremely powerful interactive whiteboard coupled with some truly amazing collaboration features and a projection surface guarantee that is second to none. Ezboard is powered by the award winning eBeam technology providing amazing response and ease of calibration.

An interactive stylus that behaves like a mouse

The small, lightweight, and comfortable pen includes left-click, right-click, and a special button for accessing the innovative on-screen tool palettes.

Did we mention innovative tool palettes?

After countless hours of research and experimentation, our designers decided to put a spin on the traditional toolbar and created a unique circular interface that provides all the tools for EzBoard software that you need most.

PowerPoint™ palette

Scrapbook palette

Desktop palette

These revolutionary tool palettes customize themselves to whatever you are doing on your computer, whether navigating programs, annotating software applications, or presenting dynamic PowerPoint™ presentations. A dedicated button on the stylus allows you to snap the palette to wherever you need it or hide it when you don't.

Web-who? Live-what?

EzBoard Projection includes FREE content sharing and collaboration features so you don't need to spend money on paid services from third party sources - all you need is an internet connection and EzBoard Scrapbook. Scrapbook is a great place to gather ideas, build lessons, record brainstorm, share documents, etc. Anything that you import into it can be shared online in real-time, including notes, drawings, PowerPoint™ slides and digital photos.

A surface with a 25 year guarantee!

The Ezboard surface is Semi-Matt Vitreous Enamel for reduced reflection and glare, the board is designed so it can still be used with standard drywipe pens during traditional sessions and it also has a 25 year surface guarantee...and its magnetic!

Four board sizes (60", 72", 80" & 100" widescreen), all with an option of a mobile trolley.

No, we didn't reinvent the wheel. We reinvented the toolbar.

The client software that comes with EzBoard - is the result of years of experience in the IT market, months of research on computer interfaces, and a whole lot of creativity. The one-of-a-kind circular tool palettes provide quick access to the central features of the software and will tailor themselves to whatever application you are working on. They can be controlled with the click of a button on the Interactive Stylus, so no matter where you may be drawing on your 100+ inch display area, the Interact palettes are always right where you need them. This unparalleled flexibility means that your audience will be focused on what you're writing, not on what you're reaching for.

Mac or Windows

Whether you like Steve Jobs or Bill Gates, you can enjoy the benefits of our work. Interact is available for both Windows and Mac. You can even share meetings between the two.

Bluetooth or USB

Create a wireless connection between the eBeam receiver and your computer at over 30 feet. Or simply plug it in directly to a USB port.

Use any digital projector

EzBoard works with any digital projector - large or small, any brightness, any resolution. Just plug it in, aim it at the wall, and click a few targets to calibrate the EzBoard with your image.

Scrapbook: A multimedia organizer for your content

Import Word™, Excel™, and PowerPoint™ files. Add jpegs and bitmaps as background images. Mix handwritten notes with text boxes or image objects. Take a screen shot of your whole screen or just a snapshot of particular portion. Whatever you bring into Scrapbook can be shared live over the Internet in real-time or saved in one of 10 popular formats - even PowerPoint™!

Sharing is good

One of the first lessons that we learn in life is that it is good to share. Only EzBoard allows you to import and share an entire PowerPoint™ presentation with 25 colleagues using simply Scrapbook software and an Internet connection. Oh, and it's FREE. EzBoard includes these content sharing and collaboration features along with free access to the eBeam Meeting Server, so you don't need to subscribe to a paid service that might not get used often enough to be worth it. Colleagues around the globe can download the free Interact software from this website and join your meeting right from the eBeam Meeting Server. Whether they have a Mac or a PC, they will see what's happening on your whiteboard in real-time and can add their own images and annotations. Sharing keeps everyone on the same page whether they are two offices away or two time zones.

An old friend with a new flair

Interact software features a PowerPoint™ specific toolbar that allows you to navigate your existing slide shows with ease and annotate them on the fly. Use the page icons on the wheel palette to move back and forth effortlessly through your presentation while standing in front of your audience, not while stuck behind a computer screen. The palette also offers pen and highlighter tools along with shapes and arrows that you can add to your slides and then save back to the .ppt file. The Interact PowerPoint™ toolbar is a great way to add new life to your tried and true presentations.

Feature Highlights

- Share meetings or your classroom
- Input text
- Import and share PowerPoint™ files in a few clicks
- Annotate directly on the screen, and over any application
- Browse and import clipart from the Gallery
- Import and manipulate image objects
- Use full-screen view to create an unobstructed, giant whiteboard space
- Save scrapbook files as PDF, PowerPoint™, HTML and most image formats.
