

# EzClassControl

network based teaching software

**remotely control, monitor, broadcast, assist** improving the teaching environment

EzClassControl is a network based teaching software designed to improve the teaching environment in the computer labs.

EzClassControl enables a teacher to remotely control, monitor, broadcast, and assist students directly from the teacher's PC. With powerful functions and a friendly user interface, EzClassControl not only helps facilitate the teaching process but also brings fun and efficiency to the learning environment. It is used in schools, colleges, universities, business environments and government.

A 5 user demonstration version of the software with limited warranty is available free of charge.

## MULTIPLE USES \*

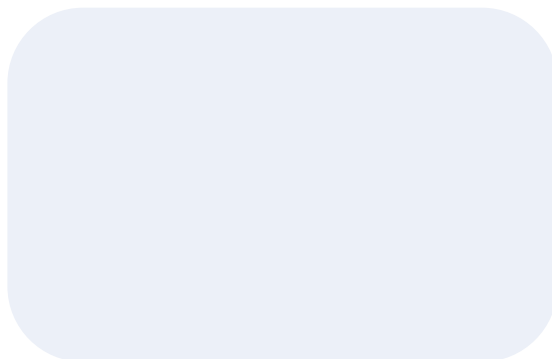

- Teachers can broadcast their screen and voice to the student computers
- Students can demo their work to the teacher and other students
- Teachers can remotely monitor and control students' desktops
