Aclass Technology to launch EzTablet Wireless USB Tablet

Education, training and conference tool specialists Aclass Technology are launching EzTablet, a new wireless graphics tablet, also known as a wireless slate, that is aimed at the school, training and conference market.

Unlike many of its competitors (RM ClassPad, Promethean Presenta, InterWrite Pad and Smart Airliner) products the EzTablet utilises the new Wireless USB standard rather than Bluetooth making it totally plug and play and a doddle to setup. The EzTablet supports multiple (up to 50) devices pairing to one receiver at the same time. The EzTablet also supports MS Vista and Apple Mac computers.

The EzTablet, selling at around £199+VAT, comes bundled with

Power Presenter	The best presentation application for making a professional presentation in Microsoft PowerPoint
Free Notes	Free Notes offers a variety of writing tools for you to send free handwriting, colourful drawings!
Office Ink	Free handwriting and digital signature inking in Word, Excel or Word pad
Macro Key Manager	With Macro Key Manager easily set up keyboard events or make a hyperlink to handle your operation efficiently

EzTablet is supplied with an integrated rechargeable Lithium polymer battery offering up to 16 hours of continuous cable free operation, recharging is via the supplied USB cable.
