

## PRESS RELEASE

January 2007 - Aclass Technology (UK) Ltd one of the leading innovators of interactive technology for the learning environment announces the launch of their new Visualizer range.

The EzVision range will initially consist of one model:- the higher specification EzVision2000. It will come complete with the standard 3 year warranty that Aclass offers on all of it's products.

These products add to the already impressive range of technologies that Aclass offer which includes their flagship response system Educlick and its new stable companions PowerClick and EzClickPro aimed at the Powerpoint and professional users respectively.

Sebastian Dearden-Briggs, Technical Development Director, says "We have always looked to increase our interactive classroom product range and the new EzVision visualizers fit perfectly with our vision of the classroom of the future combining ease of use with excellent functionality. We hope to increase the range throughout the year including some exciting and innovative products that will further enhance our reputation in this area"

Claire Dickinson, Sales Development Manager, added "With Interactive Whiteboards in classrooms reaching saturation point the EzVision Visualizer range brings new possibilities into the classroom, and anywhere else that requires the viewing of a real object in real-time. Learners gain so much more from seeing an experiment, piece of work or object without having to crowd around a desk."

The EZVision1000 will have a suggested price of £499 and the EzVision2000 will have a suggested price of £699.
